

PINE HILL FARM

wellness collective

WHAT'S NEW AT PINE HILL FARM?

We are honored to have the most loyal customers and it's exciting to learn where you're traveling from to visit our store! In addition to our local Watertown community, we've had customers traveling from Lake Country, Madison, Lake Geneva, and Illinois to mention a few! If you're one of our online customers, we encourage you to make a trip into Watertown in the near future! Our store is more than just CBD products. We guarantee it will be worth the trip as there is truly something for everyone. Plus there are other great new places to visit in Watertown and we are so excited to be in the center of it all as the new Bentzin Town Square opens this spring!

More exciting news is that our own Dr. Leanne Anthon will be completing her Level 1 certification as a BioScan practitioner! We anticipate opening up the availability on our BioScan calendar very soon as Lynley does a phenomenal job with her clients and is currently booked out to May! If BioScan is new to you, please visit our website for more information, or stop by our store and grab a brochure.

Plans are being made in preparation of planting this spring. Our organic hemp seeds are in hand and by March we will start them off right, only to be transplanted into the ground as seedlings by May. We can assure you that none of this process is easy even after harvest, but we're thrilled to be able to film drone footage this year of our 80 acre USDA certified organic crop farm, of which just 2-4 acres is the hemp plant. Stay tuned for more updates and pictures on our social media pages!

Thank you for shopping locally and choosing us for all of your CBD needs, local gifts, and wellness services. It is because of you that Pine Hill Farm is a place to be happy!

LET'S TALK: CBD SAFETY

The FDA website states that they understand there is increasing interest and research in the use of cannabis for various medical conditions, such as arthritis, depression, insomnia, IBS, migraines and more. CBD is getting noticed!

Now more than ever it's important to know where you get your CBD products from as there is little regulation of the industry. The hemp we grow on our farm in Lebanon, WI is USDA-certified organic, grown on virgin soil that has never been treated with pesticides or chemicals. Our products go through 3rd party lab testing and are either made by us in-house, or locally by other well trusted makers and manufacturers in Wisconsin.

DID YOU KNOW?

In 2020, the FDA conducted a study on products claiming to contain CBD. Results showed that 70% of the products tested were falsely labeled with either too much, far less, or no amounts of CBD. This is why 3rd party lab testing is so important!

SUPPORT SMALL...SHOP LOCAL!

Our way of supporting other small, local businesses ♥

Meet Jessica and Cory from Shoe's Brew Kombucha, a local business from Slinger, WI! All of their kombuchas are made in small batches locally. A healthy gut plays quite a role in your health and well-being. Small batch kombucha has a significant number of more strains of bacteria than store-bought kombucha, which is why we are so thrilled to carry their drinks in our wellness collective in Watertown! Check out Shoe's Brew Kombucha on Facebook and see what they all have to offer!
